# INTRODUCTION

The purpose of this document is to demonstrate the various report styles and functions across all Akixi service levels - Akixi 1000, 2000 and 3000 - as well as the Akixi mobile application.

Akixi wallboards are available across all service levels and provide a highly visual real-time overview of your team's performance against business KPIs.

# AKIXI REPORT MATRIX

## Report Styles

Please find below a table summarising the different report styles available within the Akixi Service:

			
Historic Call/Contact List	✓	✓	✓
Call/Contact Items By Half Hour Interval*	✓	✓	✓
Call/Contact Items By Day/Week/Month	✓	✓	✓
Call/Contact Items By Telephone No/ID	✓	✓	✓
Dashboard View	✓	✓	✓
Unreturned Lost Calls*	✓	✓	✓
Extension List*	✓	✓	✓
Trunk Interface List	✓	✓	✓
Call/Contact Items By DDI/ID	✓	✓	✓
Active Call/Contact List	✓	✓	✓
Wallboard*	✓	✓	✓
External Content (Via URL)	✓	✓	✓
Hunt Group List*		✓	✓
ACD Agent List*		✓	✓
ACD/DND Activity Log		✓	✓
ACD N/A Code Usage		✓	✓
Call/Contact Items By Account Code		✓	✓

Reports marked with (\*) are available on the Akixi mobile application.

Omnichannel statistics are only available with the Akixi 3000 license level.

The BLF Extension List, BLF ACD Agent List and Historic Call List can be viewed in BLF view via an Akixi Presence licensed account.

# HISTORIC CALL/CONTACT LIST

A call/contact record can have one or more segments (e.g. call transferred, call diverted, etc.). This report style generates a historic list of all those segments that have ended.

 **Tip**  
When this report is set against the 'Real-Time' date/time option, completed segments are automatically appended to the end of the report.

This report style shows call and contact information in half hour intervals, according to the defined start/end period of the report.

When viewed in real time, the current half-hour interval will display 'dynamic row highlighting', showing any calls/contacts in progress.

### Tip

This is useful when viewing general call trends over the different times of the day across an entire reporting period.

# CALL/CONTACT ITEMS BY DAY/WEEK/MONTH

This report style shows call/contact information by day/week/month intervals, according to the defined start/end period of the report. The report can be run against any date/time option.

### Tip

We recommend not running this report against the 'Real-Time' setting, as the report would only display statistics for the current day.

### Tip

Reports that are run across weekly/monthly intervals may take several minutes to complete due to the amount of call traffic previously generated on the telephone system within that period.

This report type displays a list of external numbers/IDs that external interactions have either originated from or have been made to.

When viewed in real time, 'dynamic row highlighting' shows any calls/contacts in progress.

There is no limit to the quantity of dashboard views that can be created, so supervisors could create a specific dashboard for every team, or create multiple dashboards illustrating different KPIs.

There are ten different layout options to choose from for dashboard views – see below.

# UNRETURNED LOST CALLS

Recover potential lost revenue and improve customer service by returning missed calls

This report type generates a list of external inbound abandoned calls shown in red.

When you return a missed call and that call is successfully answered, or when the external party calls in again and the call is answered, the row shown in red automatically becomes green. Eventually, all green rows will drop off the report.

## Tip

This is most useful when running the 'Real-Time' date/time option. The abandoned call list is immediately updated when a new abandoned call is generated on the telephone system or when a successfully returned call is made to a previously abandoned caller.

The Extension List shows a list of all internal devices in a table excluding trunk and hunt group devices. This report style also supports dynamic row highlighting when running the 'Real-Time' date/time option.

# EXTENSION LIST – BLF

See the status of your colleagues so that you can efficiently manage communications

Alfie Patel	Charlie Green	Charlotte Sparrow	Chloe Day
Daniel Kent	Ella FitsWilliam	Emily Banks	Evie Lopez
George Bailey	Grace Jelly	Harry Newman	Jack Burns
Jessica Bowles	Joseph Riley	Joshua Goldman	Lily Wild
Mia James	Millie Chatsfield	Oliver Smythe	Phoebe Janes
Ruby Wagner	Samuel Day	Summer DuVal	Thomas Wiles

This report style shows a list of all internal devices in a summary icon view. Statistics can be displayed by hovering the mouse over an icon.

Extension BLF also supports dynamic row highlighting and alerts based on the corresponding device's alert statistic state when running the 'Real-Time' date/time option.

# TRUNK INTERFACE LIST

## Determine how efficiently your lines are being used and if you are under/over equipped

Trunk Interface List displays the application's configured trunk device and trunk gateway devices with call statistics shown against each item.

Dynamic row highlighting is supported for 'Real-Time' variants of the report, based on whether calls originating on the corresponding trunk are currently being alerted or answered.

The report content generated displays a live list of all active interactions, and displays dynamic row highlighting to show the corresponding contact's current status.

### Tip

This style should be only used in conjunction with the 'Real-Time' date/time option.

# WALLBOARD

Display business KPIs in real time and motivate your teams

The wallboard displays real-time statistics in large individual tiles where each statistic can have a specifically configured alarm.

## Tip

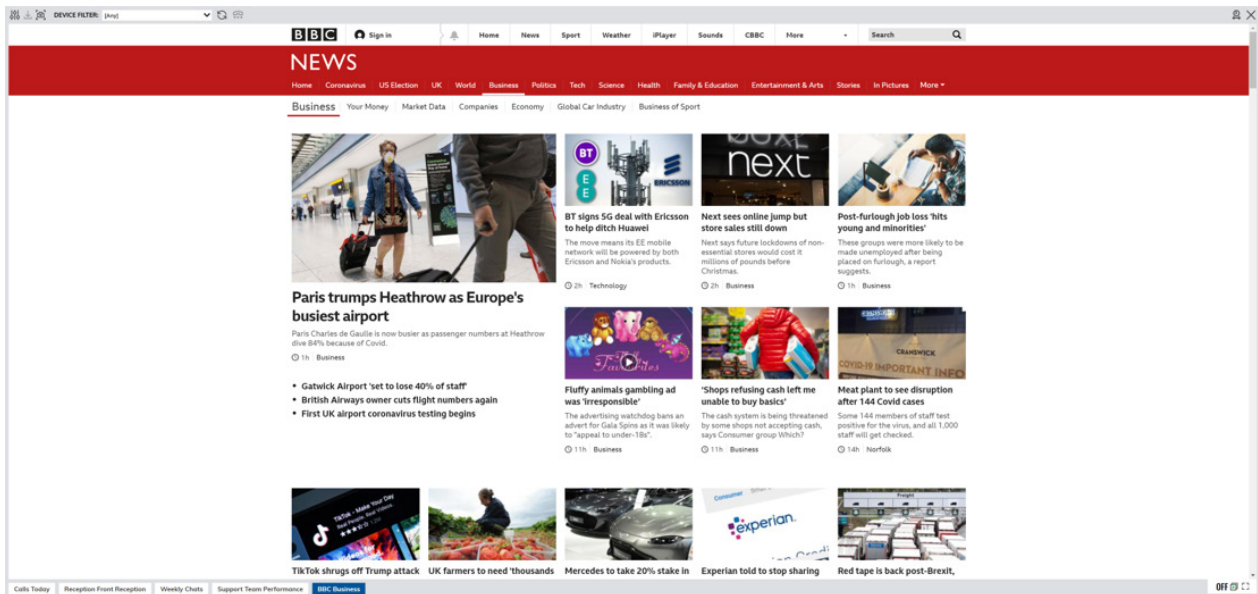

The wallboard is useful to show an overall summary of business performance which can be displayed on a large screen, tablet or smartphone to demonstrate key contact handling metrics to telephone users, agents, teams, supervisors and managers.

# EXTERNAL CONTENT (VIA URL)

## Display external content via URL for inclusion in report display transitions

This report style can display external content from a publicly available website published via a URL. This is displayed via a transitional sequence as a slide show. When this report type is run specifically with the 'Real-Time' duration option, the configured web page is continuously refreshed approximately every second.

# HUNT GROUP LIST

The ACD Agent List shows a list of all agents with call and omnichannel statistics displayed against each item. When run against the 'Real-Time' date/time option, this style also supports dynamic row highlighting based on the corresponding ACD agent's state. ACD Agent List also has a selection of 'Not Available' codes which provide different tags e.g. On Break, With A Customer, In Meeting, Vacation etc. These codes can be very useful to determine the status of your team.

# ACD AGENT LIST – BLF

Identify available colleagues and manage your communications more effectively

ACD Agent 518	ACD Agent 520	ACD Agent 520
